

Profiled Wire

Our substantial investment in equipment and our years of experience have helped establish Watson Wire as a major supplier of profiled wires to a wide range of industries.

From our purpose built complete in-house production facility, we manufacture precision rolled profiles with cross sectional areas from 1.00 mm up to 60 mm². We have our tool making facility. We can despatch coils up to 1500kg weight or bars cut to lengths in quantities.

As standard all these profiles are supplied fully cleaned, manufactured to suit your individual requirements.
